(a) Distance to the optimal set
(b) Distance-to-gap ratio
$p = 1$
fits 1.000, 1.000
$p = \frac{1}{2}$
fit 0.500
$\Delta^{-1/2}$
Bounded ratio
$\mathrm{dist}_*(H, \mathcal{M})$
$\mathrm{dist}_*(H, \mathcal{M})/\Delta$
Cost gap Δ
Full factor, $\varepsilon = 0.2$
Skew amplitude, $\varepsilon = 0.2$
Rank-one control
